Game is nice, but quite short and easy. Took me 2.7 hrs on expert difficulty to complete. I think full price is too high.. Great point and click adventure with good voice overs and a bit of detective work.. 7 hours in and stuck with no other option than to restart. For a game with no save slots and no chance to backtrack, this is just unacceptable. Especially since the game tells me that I have everything I need to solve the case, but that's obviously not true as a quick Google search for others with the same problem showed. The graphics were really pretty and the story ok. The map has fast travel, which I loved. It's only my second Hidden Object Game, so I don't know what's "normal", but the HO scenes have silhouettes you have to find and you must often combine items (Need a zebra? Find a paintbrush, use it on a white horse .). Having to find fingerprints and blood splatter in each scene with some crime kit was just plainly annoying and made me abuse the hint option. I played it in Dutch to learn and noticed that not everything was translated - probably the same for other languages. Overall, I liked the game, but I won't restart it and risk getting stuck again.. OK game but it is stuck at the "underground bank vault". Can't do anything even though it states there is a task. The help button says its not available.. A good game with decent story, good puzzles and good hidden objects scenes. + story is at some points interesting + hidden objects scenes are nice + puzzles are on good level + graphics, music and

sound effects are ok - a little to short Overall: 6.5/10
